For 1988, 6 volumes (18 issues) have been announced. *The subscription price* for these volumes is Dfl. 2280.00 (US $1232.50). Postage and handling amount to Dfl. 156.00 (US $84.50). Therefore the total price for 1988 is Dfl. 2436.00 (US $1317.00). The Dutch guilder price is definitive, dollar prices are for guidance only.

Subscriptions should be sent to the publisher, Elsevier Science Publishers B.V., Journals Department, P.O. Box 211, 1000 AE Amsterdam, or to any subscription agent or bookseller.

Claims for missing issues should be made within three months following the date of publication. The publisher expects to supply missing issues free of charge, only when losses have been sustained in transit and when the reserve stock permits.

SCOPE

This Journal publishes papers of high standard in the entire field of materials (including candidate materials) for nuclear science and technology and irradiation effects in solids. Original work and reviews are equally welcome.
The following main topics, which are not intended to cover the field exhaustively, will be included:

- Research, development, quality control and performance of nuclear fuels and fuel elements as well as structural and control materials.
- Research, development and performance of actinides as related to the nuclear field.
- Irradiation effects in fission and fusion reactor materials and other metallic and non-metallic solids.
- Environmental influences (corrosion, transport of matter, etc.) in reactor materials and systems.
- Materials aspects of nuclear safety.
- Materials aspects in recycling and reprocessing (fuel element dismantling, waste handling and disposal, vitrification, etc.).

Extractive metallurgy, and the chemistry and radiochemistry of aqueous solutions are not within the scope of the Journal.

(North-Holland Physics Publishing Division), P.O. Box 103, 1000 AC Amsterdam, The Netherlands.
Special regulations for authors — Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.
Submission to this journal of a paper entails the author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S. 351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.
Special regulations for readers in the USA — This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the US Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA. If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1981 may be copied for a per-copy fee of US $2.25, also payable through the Center. (N.B. For review journals this fee is US $0.25 per copy per page.) This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purposes, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.

SUBJECT INDEX TO VOLUMES 144 and 148–150

Actinides *(excl. Th, U, Pu)*

An examination of twinning in α-neptunium, M.F. Stevens 148 (1987) 99

Phase relationships in the neptunium–oxygen system, K. Richter and C. Sari 148 (1987) 266

Alloys *("Various" i.e. not listed elsewhere by name)*

Neutron damage microstructures of high-conductivity copper alloys, R.J. Livak, T.G. Zocco and L.W. Hobbs 144 (1987) 121

Release of tritium from yttrium and its alloys in a gas stream, M. Tanase and P.W. Fisher 144 (1987) 151

Phase relations for reactions of hydrogen with sodium oxide between 500 and 900°C, E. Veleckis and L. Leibowitz 144 (1987) 235

Short range ordering of Au–Ag alloys by low temperature electron irradiation (Letter to the Editors), R. Poerschke and H. Wollenberger 144 (1987) 278

Ion-induced desorption of oxygen from solid surfaces (Letter to the Editors), E.V. Alonso, G. Zampieri, M. Abbate and O. Grizzi 144 (1987) 287

Thermal conductivity of pressed lithium hydride and tritide compacts (Letter to the Editors), F.J. Jelinek, R.T. Tsugawa and P.C. Souers 144 (1987) 290

The niobium–carbon system (review article), J.F. Smith, O.N. Carlson and R.R. De Avillez 148 (1987) 1

Effects of neutron irradiation on polymer matrix composites at 5 K and at room temperature. I. Absorbed-dose calculation, S. Egusa, M.A. Kirk and R.C. Birtcher 148 (1987) 43

Thermodynamic studies of the solubility and of the diffusion of sulfur in Ni–15Cr–10Fe alloy, H. Talah, N. Barbouth and P. Marcus 148 (1987) 61

Diffusion and γ′-precipitation in Ni(Al) alloys under proton irradiation, P. Jung, M.I. Ansari, H. Klein and D. Meertens 148 (1987) 148

Creep and microstructural changes in dispersion hardened Ni–20% Cr–1% ThO_2 during proton irradiation, P. Jung and P.B. Chilson 149 (1987) 1

The collapse of defect cascades to dislocation loops, M.A. Kirk, I.M. Robertson, M.L. Jenkins, C.A. English, T.J. Black and J.S. Vetrano 149 (1987) 21

Neutron irradiation effects on fatigue crack propagation in Alloy 718 at 650°C (Letter to the Editors), H.H. Smith and D.J. Michel 149 (1987) 109

Preselection of Ni–Cr(–Mo) alloys as potential canister materials for vitrified high active nuclear waste by electrochemical testing, H. Bort, I. Wolf and S. Leistikow 149 (1987) 132

Isochronal recovery and damage rate measurements in electron-irradiated dilute NiGe, A. Bartels, F. Dworschak and M. Weigert 149 (1987) 160

Mass transport of cobalt and copper in Monel-400, A.R. Paul, M.C. Naik and K.S. Venkateswarlu 149 (1987) 277

Microstructure and properties of copper alloys following 14-MeV neutron irradiation, S.J. Zinkle 150 (1987) 140

Chemical enhancement of secondary ion emission from Cd^+ ion bombarded Mo, Ti, Al and Cu surfaces, N. Ray, P. Chakraborty and S.D. Dey 150 (1987) 331

Aluminium, Aluminium Alloys and Compounds

Annealing behavior of krypton-implanted aluminum. I. Diffraction effects from krypton bubbles, I. Hashimoto, H. Yorikawa, H. Mitsuya, H. Yamaguchi, K. Takaishi, T. Kikuchi, K. Furuya, E. Yagi and M. Iwaki 149 (1987) 69

Annealing behavior of krypton-implanted aluminum. II. SEM study on surface strucure during emission of krypton atoms, I. Hashimoto, H. Yorikawa, H. Mitsuya, H. Yamaguchi, K. Furuya, E. Yagi and M. Iwaki 150 (1987) 100

Chemical enhancement of secondary ion emission from Cd^+ ion bombarded Mo, Ti, Al and Cu surfaces, N. Ray, P. Chakraborty and S.D. Dey 150 (1987) 331

Analytical Techniques

An analytical model for the ductile failure of biaxially loaded type 316 stainless steel subjected to thermal transients, R.J. DiMelfi 144 (1987) 171

Problems in the analysis of plasma collector probes, P. Børgesen, L.G. Svendsen and J. Ehrenberg 144 (1987) 181
Composition of precipitates present in Zircaloy-2 and 4 (Letter to the Editors), D. Arias, T. Palacios and C. Turrillo 148 (1987) 227

Ceramics *("Various" i.e. not listed elsewhere by name)*

Erosion yield of Ti from TiC-deposited graphite by hydrogen ion bombardment at high temperatures, S. Sukenobu, Y. Gomay, H. Ohno and K. Morita 148 (1987) 66
A simplified model for stable open porosity, F.A. Nichols 148 (1987) 92
Phase identification, microstructural characterization, phase microanalyses and leaching performance evaluation of SYNROC-FA crystalline ceramic waste form, A.G. Solomah, P.G. Richardson and A.K. McIlwain 148 (1987) 157
Deformation of polycrystalline Li_2O, K.C. Goretta, D.S. Applegate, R.B. Poeppel, M.C. Billone and J.L. Routbort 148 (1987) 166
A study of chemical parameters of the internal gelation based sol–gel process for uranium dioxide, V.N. Vaidya, S.K. Mukerjee, J.K. Joshi, R.V. Kamat and D.D. Sood 148 (1987) 324
Pore structure in oxide films on irradiated and unirradiated zirconium alloys, B. Cox 148 (1987) 332
Thermal expansion of Synroc minerals (Letter to the Editors), R.B. Roberts, G.K. White, W.J. Buykx and D.J. Cassidy 148 (1987) 353
Chemical vapor deposition of silicon carbide for coated fuel particles, K. Minato and K. Fukuda 149 (1987) 233
Recovery behavior in neutron irradiated β-SiC, T. Suzuki, T. Maruyama, T. Iseki, T. Mori and M. Ito 149 (1987) 334
Thermal shock testing of ceramics with pulsed laser irradiation, R. Benz, A. Naoumidis and H. Nickel 150 (1987) 128
Volume change of Al_2O_3 and $MgAl_2O_4$ induced by 14-MeV neutron irradiation, K. Tanimura, N. Itoh and F.W. Clinard 150 (1987) 182
Sputtering yield of $Ti_{1-x}B_x$ films by 2 keV deuterium bombardment, T. Shikama, Y. Sakai and M. Okada 150 (1987) 302

Coatings *(incl. Coated Particles)*

Corrosion resistance of ion-plated molybdenum thin-coating of austenitic steel in a flowing sodium environment, T. Suzuki, I. Mutoh and M. Fukutomi 144 (1987) 29
Characterization and deuterium ion bombardment behaviour of titanium carbide coatings, R.P. Agarwala, A.K. Dua and B.M. Pande 148 (1987) 204
Chemical vapor deposition of silicon carbide for coated fuel particles, K. Minato and K. Fukuda 149 (1987) 233
Thermal shock testing of ceramics with pulsed laser irradiation, R. Benz, A. Naoumidis and H. Nickel 150 (1987) 128

Compatibility and Corrosion

Corrosion resistance of ion-plated molybdenum thin-coating of austenitic steel in a flowing sodium environment, T. Suzuki, I. Mutoh and M. Fukutomi 144 (1987) 29
The oxidation of uranium–0.75 wt% titanium in environments containing oxygen and/or water vapor at 140°C, C.J. Greenholt and L.J. Weirick 144 (1987) 110
Oxidation of plutonium–1 wt% gallium in nitrogen/5.5% oxygen atmospheres (Letter to the Editors), J.L. Stakebake and L.A. Lewis 148 (1987) 115
Tritium compatibility measurements of turbomolecular pump oil in a miniaturised viscosimeter, R. Lässer, K.-H. Klatt, D. Triefenbach and J.L. Hemmerich 148 (1987) 145
Effects of stagnant liquid rubidium and the Rb–5 wt% O system on a stainless steel at 473 K (Letter to the Editors), T. Suzuki, K. Ohno, S. Masuda, Y. Nakanishi and Y. Matsui 148 (1987) 230
Compatibility of high-purity Fe–(5 to 15)Cr–1Mo ferritic steels in a sodium environment, T. Suzuki and I. Mutoh 149 (1987) 41
Preselection of Ni–Cr(–Mo) alloys as potential canister materials for vitrified high active nuclear waste by electrochemical testing, H. Bort, I. Wolf and S. Leistikow 149 (1987) 132
A study on the mechanism of iodine-induced stress-corrosion cracking of Zircaloy-4, K.-N. Choo, S.-I. Pyun and J.-K. Choi 149 (1987) 289
Vaporisation thermodynamics of the nickel-rich phases in the Ni–Te binary system – A high temperature mass spectrometric study, R. Viswanathan, M. Sai Baba, D. Darwin Albert Raj, R. Balasubramanian, B. Saha and C.K. Mathews 149 (1987) 302
Stability of ternary oxygen compounds of molybdenum in liquid sodium, T. Gnanasekaran, K.H. Mahendran, G. Periaswami, C.K. Mathews and H.U. Borgstedt 150 (1987) 113

Computer Calculations, including Modelling

The importance of the PKA-energy spectrum for radiaton damage simulation, R. Dierckx 144 (1987) 214
The influence of temperature on void-lattice formation and swelling, C.H. Woo and W. Frank 148 (1987) 121

Incident angle dependence of sputtering yields for hydrogen bombardment of light elements, W. Eckstein, A. Sagara and K. Kamada 150 (1987) 266
Beiträge zur phänomenologischen Beschreibung der Kinetik von Oberflächenprozessen für das System Gas–Festkörper, H.J. Leyers 150 (1987) 281

Constitution

Phase transition temperature in Zircaloy-2 (Letter to the Editors), D. Arias and R. Castillo Guerra 144 (1987) 196
Phase relations for reactions of hydrogen with sodium oxide between 500 and 900°C, E. Veleckis and L. Leibowitz 144 (1987) 235
Composition of precipitates present in Zircaloy-2 and 4 (Letter to the Editors), D. Arias, T. Palacios and C. Turrillo 148 (1987) 227
Phase relationships in the neptunium–oxygen system, K. Richter and C. Sari 148 (1987) 266
Phase equilibria and crystal structures in the ternary systems: actinoid metal–transition metal–boron. I. Plutonium-borides with the $LuRuB_2$-type of structure, P. Rogl, P.E. Potter and H.R. Haines 149 (1987) 283

Creep and Relaxation

A third stage of irradiation creep involving its cessation at high neutron exposures, F.A. Garner, D.L. Porter and B.J. Makenas 148 (1987) 279
Creep and microstructural changes in dispersion hardened Ni–20% Cr–1% ThO_2 during proton irradiation, P. Jung and P.B. Chilson 149 (1987) 1

Crystallographic Properties

Study of current density effects of secondary ion emission from fcc, bcc and hcp crystal structures, N. Ray, P. Chakraborty and S.D. Dey 144 (1987) 51
Magnetochemistry and crystal chemistry of ternary actinoidmetal-silicides $\{Th, U\}$-$\{Cu, Ru, Os, Ir, Pt\}_2Si_2$ (Letter to the Editors), K. Hiebl and P. Rogl 144 (1987) 193
Phase identification, microstructural characterization, phase microanalyses and leaching performance evaluation of SYNROC-FA crystalline ceramic waste form, A.G. Solomah, P.G. Richardson and A.K. McIlwain 148 (1987) 157
On the anisotropy of zirconium and its alloys with niobium, A.V. Chirkin, N.R. Gajum, A.I. Ben Shaban and K. Kher Ramadan 148 (1987) 171
Phase equilibria and crystal structures in the ternary systems: actinoid metal–transition metal–boron. I. Plutonium-borides with the $LuRuB_2$-type of structure, P. Rogl, P.E. Potter and H.R. Haines 149 (1987) 283

Defects and Defect Structures

The interaction between nitrogen and vacancies in molybdenum observed with thermal helium desorption spectrometry, H.A. Filius and A. Van Veen 144 (1987) 1
The importance of the PKA-energy spectrum for radiaton damage simulation, R. Dierckx 144 (1987) 214
Positron annihilation studies on alpha-irradiated and deformed niobium, S.V. Naidu, A. Sen Gupta and P. Sen 148 (1987) 86
The importance of oxygen to helium–defect trapping in zirconium, M.B. Lewis 148 (1987) 175
The collapse of defect cascades to dislocation loops, M.A. Kirk, I.M. Robertson, M.L. Jenkins, C.A. English, T.J. Black and J.S. Vetrano 149 (1987) 21
c-component dislocations in Zr–2.5 wt% Nb alloy, R.A. Holt, M. Griffiths and R.W. Gilbert 149 (1987) 51
Isochronal recovery and damage rate measurements in electron-irradiated dilute NiGe, A. Bartels, F. Dworschak and M. Weigert 149 (1987) 160
Neutron irradiation damage in 64% cold-worked titanium, M. Griffiths, C.D. Cann and R.C. Styles 149 (1987) 200
Zones of radiation point defect instability near the [100] (010) edge dislocation in α-Fe, V.V. Kolomytkin 149 (1987) 321
Annealing behavior of krypton-implanted aluminum. II. SEM study on surface strucure during emission of krypton atoms, I. Hashimoto, H. Yorikawa, H. Mitsuya, H. Yamaguchi, K. Furuya, E. Yagi and M. Iwaki 150 (1987) 100
The formation of *c*-component defects in zirconium alloys during neutron irradiation, M. Griffiths and R.W. Gilbert 150 (1987) 169

Diffusion *(incl. Thermodiffusion)*

Hydrogen pumping and compression by superpermeation through iron, H. Hackfort, K. Bösche, F. Waelbroeck, J. Winter and P. Wienhold 144 (1987) 10
Pressure modulated absorption–desorption: permeation, diffusion and surface rate coefficients for hydrogen in nickel and palladium, D.L. Cummings and D.A. Blackburn 144 (1987) 81
Lattice and grain boundary diffusion in polycrystalline thoria–urania, D.R. Olander 144 (1987) 105

Diffusive transport through a medium of static traps, P.M. Richards 144 (1987) 228
Diffusion and γ'-precipitation in Ni(Al) alloys under proton irradiation, P. Jung, M.I. Ansari, H. Klein and D. Meertens 148 (1987) 148
On diffusion and precipitation of gas-in-solid, C. Ronchi 148 (1987) 316
Étude de la diffusion chimique de l'oxygène dans $(U_{0,8}Pu_{0,2})O_{2-x}$ à 1400°C (Letter to the Editors), R. Ducroux, A.S. Bayoglu, M. Fromont and R. Lorenzelli 149 (1987) 101
Diffusion and trapping of ion-implanted helium in nickel, M.B. Lewis 149 (1987) 143
Hydrogen in 304 steel: diffusion, permeation and surface reaction, D.M. Grant, D.L. Cummings and D.A. Blackburn 149 (1987) 180
Tritium release from neutron-irradiated Li_2O: Diffusion in single crystal, T. Tanifuji, K. Noda, T. Takahashi and H. Watanabe 149 (1987) 227
Mass transport of cobalt and copper in Monel-400, A.R. Paul, M.C. Naik and K.S. Venkateswarlu 149 (1987) 277
Effects of additives and the oxygen potential on the fission gas diffusion in UO_2 fuel, K. Une, I. Tanabe and M. Oguma 150 (1987) 93

Electron Microscopy and Electron Probe Microanalysis

First observations of microstructural changes in delta Pu by transmission electron microscopy (Letter to the Editors), D.L. Rohr and K.P. Staudhammer 144 (1987) 202
Evidence of pyramidal slip mode in cold-rolled Zircaloy-4 sheets (Letter to the Editors), P. Merle 144 (1987) 275
Microstructure of helium-implanted Nimonic PE16, A. Czyrska-Filemonowicz, A.A. Gadalla, B. Weckermann and W. Kesternich 150 (1987) 24

Experimental Techniques

On the oxidation of zirconium by heat tinting, I.A. El-Shanshoury, A.V. Chirkin and A. El-Yazgi 149 (1987) 74
Development of a further-miniaturized specimen of 3 mm diameter for TEM disk (3 mm) small punch tests, X. Mao and H. Takahashi 150 (1987) 42
Segmented expanding mandrel test methods (Letter to the Editors), J.P. Foster 150 (1987) 342

Fatigue and Fracture

Effects of irradiation on the fracture toughness of FBR structural materials, D.J. Michel and R.A. Gray 148 (1987) 194
Neutron irradiation effects on fatigue crack propagation in Alloy 718 at 650°C (Letter to the Editors), H.H. Smith and D.J. Michel 149 (1987) 109
Fatigue-crack propagation behavior of HT-9 steel, L.A. James 149 (1987) 138
Crack tip stress intensity factor changes arising from voids, gas filled bubbles and microcracks in irradiated materials, J. Weertman 149 (1987) 150
Mechanical and fracture toughness properties of an irradiated 20MnMoNi55 pressure vessel steel weld (Letter to the Editors), M.M. Ghoniem, D. Pachur and F.H. Hammad 149 (1987) 272
Evaluation of ageing-induced embrittlement in an austenitic stainless steel by instrumented impact testing, K.G. Samuel, P.R. Sreenivasan, S.K. Ray and P. Rodriguez 150 (1987) 78
Thermal shock testing of ceramics with pulsed laser irradiation, R. Benz, A. Naoumidis and H. Nickel 150 (1987) 128
Strain-time effects in low-cycle fatigue of nickel-base heat-resistant alloys at high temperature, H. Tsuji and T. Kondo 150 (1987) 259

Fission Products

Reactions of cesium with nonstoichiometric UO_{2+x} and $U_{0.86}Gd_{0.14}O_{2\pm x}$ pellets, K. Une 144 (1987) 128
Fission product release from nuclear fuel by recoil and knockout, B.J. Lewis 148 (1987) 28
In-pile release behavior of metallic fission products in graphite materials of an HTGR fuel assembly, K. Hayashi, F. Kobayashi, K. Minato, K. Ikawa and K. Fukuda 149 (1987) 57
Fuel morphology effects on the chemical form of iodine release from severely damaged fuel, A.W. Cronenberg and D.J. Osetek 149 (1987) 252
Vaporisation thermodynamics of the nickel-rich phases in the Ni–Te binary system – A high temperature mass spectrometric study, R. Viswanathan, M. Sai Baba, D. Darwin Albert Raj, R. Balasubramanian, B. Saha and C.K. Mathews 149 (1987) 302
Effects of additives and the oxygen potential on the fission gas diffusion in UO_2 fuel, K. Une, I. Tanabe and M. Oguma 150 (1987) 93
Modeling the behavior of Xe, I, Cs, Te, Ba, and Sr in solid and liquefied fuel during severe accidents, J. Rest and A.W. Cronenberg 150 (1987) 203

Fuel Reprocessing

Characterisation of the activities associated with fast reactor cladding hulls, P. Biddle and J.H. Rees 149 (1987) 7

Fuels and Fuel Elements: Fast Reactors

Effect of oxygen and nitrogen impurities on the thermodynamic properties of urani-

um–plutonium mixed carbide fuel, M. Saibaba, S. Vana Varamban and C.K. Mathews 144 (1987) 56
Vaporisation thermodynamics of the nickel-rich phases in the Ni–Te binary system – A high temperature mass spectrometric study, R. Viswanathan, M. Sai Baba, D. Darwin Albert Raj, R. Balasubramanian, B. Saha and C.K. Mathews 149 (1987) 302
Microstructure of helium-implanted Nimonic PE16, A. Czyrska-Filemonowicz, A.A. Gadalla, B. Weckermann and W. Kesternich 150 (1987) 24
Carbon potential and carbide equilibrium in 18/8 austenitic steels, S. Rajendran Pillai and C.K. Mathews 150 (1987) 31
Stability of ternary oxygen compounds of molybdenum in liquid sodium, T. Gnanasekaran, K.H. Mahendran, G. Periaswami, C.K. Mathews and H.U. Borgstedt 150 (1987) 113

Fuels and Fuel Elements: High-Temperature Reactors

Effects of carburization and aging on the tensile properties of an experimental Ni–Cr–W superalloy, M. Shindo and H. Nakajima 144 (1987) 20
In-pile release behavior of metallic fission products in graphite materials of an HTGR fuel assembly, K. Hayashi, F. Kobayashi, K. Minato, K. Ikawa and K. Fukuda 149 (1987) 57
Chemical vapor deposition of silicon carbide for coated fuel particles, K. Minato and K. Fukuda 149 (1987) 233
Strain-time effects in low-cycle fatigue of nickel-base heat-resistant alloys at high temperature, H. Tsuji and T. Kondo 150 (1987) 259

Fuel and Fuel Elements: Thermal Reactors

On diffusion and precipitation of gas-in-solid, C. Ronchi 148 (1987) 316
A study of chemical parameters of the internal gelation based sol–gel process for uranium dioxide, V.N. Vaidya, S.K. Mukerjee, J.K. Joshi, R.V. Kamat and D.D. Sood 148 (1987) 324
Grain growth in high density UO_2 (Letter to the Editors), F. Glodeanu, I. Furtuna, A. Paraschiv and M. Paraschiv 148 (1987) 351
Survey of the power ramp performance testing of KWU's PWR UO_2 fuel, M. Gärtner and G. Fischer 149 (1987) 29
On the rate determining step in fission gas release from high burn-up water reactor fuel during power transients, C.T. Walker and M. Mogensen 149 (1987) 121
Fuel morphology effects on the chemical form of iodine release from severely damaged fuel, A.W. Cronenberg and D.J. Osetek 149 (1987) 252
A study on the mechanism of iodine-induced stress-corrosion cracking of Zircaloy-4, K.-N. Choo, S.-I. Pyun and J.-K. Choi 149 (1987) 289
Modeling the behavior of Xe, I, Cs, Te, Ba, and Sr in solid and liquefied fuel during severe accidents, J. Rest and A.W. Cronenberg 150 (1987) 203
Irradiation behavior of low-enriched U_6Fe–Al dispersion fuel elements (Letter to the Editors), G.L. Hofman, R.F. Domagala and G.L. Copeland 150 (1987) 238

Fusion Reactors: Blanket Materials *(incl. Lithium)*

Pressure modulated absorption–desorption: permeation, diffusion and surface rate coefficients for hydrogen in nickel and palladium, D.L. Cummings and D.A. Blackburn 144 (1987) 81
Thermal conductivity of pressed lithium hydride and tritide compacts (Letter to the Editors), F.J. Jelinek, R.T. Tsugawa and P.C. Souers 144 (1987) 290
Deformation of polycrystalline Li_2O, K.C. Goretta, D.S. Applegate, R.B. Poeppel, M.C. Billone and J.L. Routbort 148 (1987) 166
Chemical behaviors of tritium formed in a LiF–BeF_2 mixture, H. Moriyama, S. Maeda, T. Ohmura, K. Moritani and J. Oishi 148 (1987) 211
Shrinkage and opacity of 100 kg/m^3 silica aerogel foam in liquid deuterium–tritium (Letter to the Editors), E.M. Fearon, P.R. Coronado, R.G. Garza, D.H. Darling and P.C. Souers 149 (1987) 105
Tritium release from neutron-irradiated Li_2O: Diffusion in single crystal, T. Tanifuji, K. Noda, T. Takahashi and H. Watanabe 149 (1987) 227
Activation product transport in FLiBe–vanadium alloy–HT9 system, A.C. Klein and D.-K. Sze 149 (1987) 261
Isothermal release of tritium from neutron-irradiated $Li_{17}Pb_{83}$, Y. Shibuya, M. Aida, Y. Fujii and M. Okamoto 150 (1987) 286

Fusion Reactors: Impurity Transport in Plasma

Hydrocarbon formation due to hydrogen ion impact on amorphous hydrogenated carbon films (Letter to the Editors), J.W. Davis and A.A. Haasz 149 (1987) 349
Another view of the control of the isotopic composition of initial DT plasmas in tokamaks (Letter to the Editors), B. Terreault 150 (1987) 244

Respond to the article: "Another view of the control of the isotopic composition of initial DT plasmas in tokamaks", by B. Terreault (Letter to the Editors), B.L. Doyle 150 (1987) 246

Fusion Reactors: Structural Materials

Hydrogen pumping and compression by superpermeation through iron, H. Hackfort, K. Bösche, F. Waelbroeck, J. Winter and P. Wienhold 144 (1987) 10

Helium production and long-term activation by protons and deuterons in metals for fusion reactor application, P. Jung 144 (1987) 43

Problems in the analysis of plasma collector probes, P. Børgesen, L.G. Svendsen and J. Ehrenberg 144 (1987) 181

Structure of helium loaded stainless steel after short heat pulses (Letter to the Editors), P. Schiller, D. Quataert, M. Cambini and F. Brossa 148 (1987) 224

Diffusion and trapping of ion-implanted helium in nickel, M.B. Lewis 149 (1987) 143

Work softening behaviour in cold drawn oxygen-free high conductivity copper for fusion reactor use, G. Piatti and H.A. Weir 150 (1987) 1

Microstructure of helium-implanted Nimonic PE16, A. Czyrska-Filemonowicz, A.A. Gadalla, B. Weckermann and W. Kesternich 150 (1987) 24

Beiträge zur phänomenologischen Beschreibung der Kinetik von Oberflächenprozessen für das System Gas–Festkörper, H.J. Leyers 150 (1987) 281

Fusion Reactors: Surface Effects

Evidence for helium pipe diffusion along dislocations in molybdenum, W.Th.M. Buters and A. Van den Beukel 144 (1987) 71

Problems in the analysis of plasma collector probes, P. Børgesen, L.G. Svendsen and J. Ehrenberg 144 (1987) 181

Diffusive transport through a medium of static traps, P.M. Richards 144 (1987) 228

A method to control isotopic composition of initial DT plasmas in tokamaks (Letter to the Editors), B.L. Doyle 144 (1987) 280

Microstructural examination of several commercial alloys neutron irradiated to 100 dpa, D.S. Gelles 148 (1987) 136

Characterization and deuterium ion bombardment behaviour of titanium carbide coatings, R.P. Agarwala, A.K. Dua and B.M. Pande 148 (1987) 204

Structure of helium loaded stainless steel after short heat pulses (Letter to the Editors), P. Schiller, D. Quataert, M. Cambini and F. Brossa 148 (1987) 224

Observation of shape change in the Raman spectrum of graphite exposed to deuterium glow (Letter to the Editors), M. Kitajima, K. Aoki and M. Okada 149 (1987) 269

Hydrocarbon formation due to hydrogen ion impact on amorphous hydrogenated carbon films (Letter to the Editors), J.W. Davis and A.A. Haasz 149 (1987) 349

Thermal shock testing of ceramics with pulsed laser irradiation, R. Benz, A. Naoumidis and H. Nickel 150 (1987) 128

Another view of the control of the isotopic composition of initial DT plasmas in tokamaks (Letter to the Editors), B. Terreault 150 (1987) 244

Respond to the article: "Another view of the control of the isotopic composition of initial DT plasmas in tokamaks", by B. Terreault (Letter to the Editors), B.L. Doyle 150 (1987) 246

Incident angle dependence of sputtering yields for hydrogen bombardment of light elements, W. Eckstein, A. Sagara and K. Kamada 150 (1987) 266

Sputtering yield of $Ti_{1-x}B_x$ films by 2 keV deuterium bombardment, T. Shikama, Y. Sakai and M. Okada 150 (1987) 302

Gases *(excl. Tritium)* in Metals, Alloys and Ceramics

Helium production and long-term activation by protons and deuterons in metals for fusion reactor application, P. Jung 144 (1987) 43

Evidence for helium pipe diffusion along dislocations in molybdenum, W.Th.M. Buters and A. Van den Beukel 144 (1987) 71

Release of tritium from yttrium and its alloys in a gas stream, M. Tanase and P.W. Fisher 144 (1987) 151

Simulation of the nucleation and growth of helium platelets in nickel (Letter to the Editors), M. D'Olieslaeger, G. Knuyt, L. De Schepper and L.M. Stals 144 (1987) 200

Diffusive transport through a medium of static traps, P.M. Richards 144 (1987) 228

Ion-induced desorption of oxygen from solid surfaces (Letter to the Editors), E.V. Alonso, G. Zampieri, M. Abbate and O. Grizzi 144 (1987) 287

A TEM study of helium trapping in cold worked single crystalline molybdenum, W.Th.M. Buters, J.H. Evans, A. Van Veen and A. Van den Beukel 148 (1987) 17

Surface damage of metallic glasses by argon ion bombardment, A.K. Tyagi and R.V. Nandedkar 148 (1987) 76

The importance of oxygen to helium–defect trapping in zirconium, M.B. Lewis 148 (1987) 175

Structure of helium loaded stainless steel after short heat pulses (Letter to the Editors),

P. Schiller, D. Quataert, M. Cambini and F. Brossa 148 (1987) 224
On diffusion and precipitation of gas-in-solid, C. Ronchi 148 (1987) 316
Annealing behavior of krypton-implanted aluminum. I. Diffraction effects from krypton bubbles, I. Hashimoto, H. Yorikawa, H. Mitsuya, H. Yamaguchi, K. Takaishi, T. Kikuchi, K. Furuya, E. Yagi and M. Iwaki 149 (1987) 69
On the rate determining step in fission gas release from high burn-up water reactor fuel during power transients, C.T. Walker and M. Mogensen 149 (1987) 121
Diffusion and trapping of ion-implanted helium in nickel, M.B. Lewis 149 (1987) 143
Crack tip stress intensity factor changes arising from voids, gas filled bubbles and microcracks in irradiated materials, J. Weertman 149 (1987) 150
Fuel morphology effects on the chemical form of iodine release from severely damaged fuel, A.W. Cronenberg and D.J. Osetek 149 (1987) 252
Helium flux to grain boundaries during irradiation (Letter to the Editors), A.J.E. Foreman and B.N. Singh 149 (1987) 266
Observation of shape change in the Raman spectrum of graphite exposed to deuterium glow (Letter to the Editors), M. Kitajima, K. Aoki and M. Okada 149 (1987) 269
Growth of inert gas bubbles after implantation, N. Marochov, L.J. Perryman and P.J. Goodhew 149 (1987) 296
Microstructure of helium-implanted Nimonic PE16, A. Czyrska-Filemonowicz, A.A. Gadalla, B. Weckermann and W. Kesternich 150 (1987) 24
Annealing behavior of krypton-implanted aluminum. II. SEM study on surface strucure during emission of krypton atoms, I. Hashimoto, H. Yorikawa, H. Mitsuya, H. Yamaguchi, K. Furuya, E. Yagi and M. Iwaki 150 (1987) 100
On accurate expressions for the critical quantities for cavity swelling (Letter to the Editors), L.K. Mansur 150 (1987) 105
Modeling the behavior of Xe, I, Cs, Te, Ba, and Sr in solid and liquefied fuel during severe accidents, J. Rest and A.W. Cronenberg 150 (1987) 203

Glasses and Amorphous Materials

Effects of neutron irradiation on polymer matrix composites at 5 K and at room temperature. I. Absorbed-dose calculation, S. Egusa, M.A. Kirk and R.C. Birtcher 148 (1987) 43
Effects of neutron irradiation on polymer matrix composites at 5 K and at room temperature. II. Degradation of mechanical properties, S. Egusa, M.A. Kirk and R.C. Birtcher 148 (1987) 53
Surface damage of metallic glasses by argon ion bombardment, A.K. Tyagi and R.V. Nandedkar 148 (1987) 76
Air contamination by cesium in a canister containing nuclear waste glass (Letter to the Editors), H. Kamizono, S. Kikkawa, S. Tashiro, H. Nakamura and H. Kanazawa 149 (1987) 113

Grain Boundary

Helium flux to grain boundaries during irradiation (Letter to the Editors), A.J.E. Foreman and B.N. Singh 149 (1987) 266

Graphite and Carbon

A method to control isotopic composition of initial DT plasmas in tokamaks (Letter to the Editors), B.L. Doyle 144 (1987) 280
Effects of neutron irradiation on polymer matrix composites at 5 K and at room temperature. I. Absorbed-dose calculation, S. Egusa, M.A. Kirk and R.C. Birtcher 148 (1987) 43
Effects of neutron irradiation on polymer matrix composites at 5 K and at room temperature. II. Degradation of mechanical properties, S. Egusa, M.A. Kirk and R.C. Birtcher 148 (1987) 53
Erosion yield of Ti from TiC-deposited graphite by hydrogen ion bombardment at high temperatures, S. Sukenobu, Y. Gomay, H. Ohno and K. Morita 148 (1987) 66
Thermal desorption of deuterium from graphite doped with iron, K. Ashida, K. Ichimura, M. Matsuyama and K. Watanabe 148 (1987) 217
Acoustic emission caused by reversed plastic deformation in polycrystalline graphite, I. Ioka and S. Yoda 148 (1987) 344
In-pile release behavior of metallic fission products in graphite materials of an HTGR fuel assembly, K. Hayashi, F. Kobayashi, K. Minato, K. Ikawa and K. Fukuda 149 (1987) 57
Observation of shape change in the Raman spectrum of graphite exposed to deuterium glow (Letter to the Editors), M. Kitajima, K. Aoki and M. Okada 149 (1987) 269
Hydrocarbon formation due to hydrogen ion impact on amorphous hydrogenated carbon films (Letter to the Editors), J.W. Davis and A.A. Haasz 149 (1987) 349

Carbon potential and carbide equilibrium in 18/8 austenitic steels, S. Rajendran Pillai and C.K. Mathews 150 (1987) 31
Thermal shock testing of ceramics with pulsed laser irradiation, R. Benz, A. Naoumidis and H. Nickel 150 (1987) 128
Incident angle dependence of sputtering yields for hydrogen bombardment of light elements, W. Eckstein, A. Sagara and K. Kamada 150 (1987) 266

Hydrogen and Hydrides
Hydrogen pumping and compression by superpermeation through iron, H. Hackfort, K. Bösche, F. Waelbroeck, J. Winter and P. Wienhold 144 (1987) 10
Hydrogen and deuterium profiling at the surface of zirconium alloys. I. The effects of surface preparation, A. Stern, D. Khatamian, T. Laursen, G.C. Weatherly and J.M. Perz 144 (1987) 35
Pressure modulated absorption–desorption: permeation, diffusion and surface rate coefficients for hydrogen in nickel and palladium, D.L. Cummings and D.A. Blackburn 144 (1987) 81
Phase relations for reactions of hydrogen with sodium oxide between 500 and 900°C, E. Veleckis and L. Leibowitz 144 (1987) 235
A method to control isotopic composition of initial DT plasmas in tokamaks (Letter to the Editors), B.L. Doyle 144 (1987) 280
Hydrogen blistering and bubble formation in metallic glasses $Fe_{40}Ni_{40}P_{14}B_6$ and $Fe_{40}Ni_{38}Mo_4B_{18}$, A.K. Tyagi and R.V. Nandedkar 148 (1987) 72
Hydrogen and deuterium profiling at the surface of zirconium alloys. II. The effects of oxidation, A. Stern, D. Khatamian, T. Laursen, G.C. Weatherly and J.M. Perz 148 (1987) 257
Hydrogen in 304 steel: diffusion, permeation and surface reaction, D.M. Grant, D.L. Cummings and D.A. Blackburn 149 (1987) 180
Critical helium fluence for hydrogen trapping in pre-damaged stainless steel, M. Ogawa, K. Saneyoshi, Y. Takagi, A. Shirota and Y. Suzawa 149 (1987) 247
Hydrocarbon formation due to hydrogen ion impact on amorphous hydrogenated carbon films (Letter to the Editors), J.W. Davis and A.A. Haasz 149 (1987) 349
Beiträge zur phänomenologischen Beschreibung der Kinetik von Oberflächenprozessen für das System Gas–Festkörper, H.J. Leyers 150 (1987) 281

Impurities
The interaction between nitrogen and vacancies in molybdenum observed with thermal helium desorption spectrometry, H.A. Filius and A. Van Veen 144 (1987) 1
Effect of oxygen and nitrogen impurities on the thermodynamic properties of uranium–plutonium mixed carbide fuel, M. Saibaba, S. Vana Varamban and C.K. Mathews 144 (1987) 56
Impurity generation due to non-thermal electrons and its control by external bias, S. Takamura, A. Sato, Y. Shen and T. Okuda 149 (1987) 212

Iron and Iron Alloys *(see Steels)*
Hydrogen pumping and compression by superpermeation through iron, H. Hackfort, K. Bösche, F. Waelbroeck, J. Winter and P. Wienhold 144 (1987) 10
A study of the precipitation of copper particles in a ferrite matrix, G.M. Worrall, J.T. Buswell, C.A. English, M.G. Hetherington and G.D.W. Smith 148 (1987) 107

Irradiation Effects *(excl. Swelling and Voids)*
Helium production and long-term activation by protons and deuterons in metals for fusion reactor application, P. Jung 144 (1987) 43
Study of current density effects of secondary ion emission from fcc, bcc and hcp crystal structures, N. Ray, P. Chakraborty and S.D. Dey 144 (1987) 51
Neutron damage microstructures of high-conductivity copper alloys, R.J. Livak, T.G. Zocco and L.W. Hobbs 144 (1987) 121
Multiple fracture planes in deuteron irradiated metals, W.R. Jones and P.B. Johnson 144 (1987) 157
Simulation of the nucleation and growth of helium platelets in nickel (Letter to the Editors), M. D'Olieslaeger, G. Knuyt, L. De Schepper and L.M. Stals 144 (1987) 200
Recovery of electrical resistivity in neutron irradiated steels (Letter to the Editors), S. Takamura, K. Kitajima and H. Abe 144 (1987) 205
The importance of the PKA-energy spectrum for radiaton damage simulation, R. Dierckx 144 (1987) 214
Phase transformations in ion irradiated Ti–6242s alloys, D.L. Plumton, G.L. Kulcinski and R.A. Dodd 144 (1987) 252
Radiation induced precipitation in 9 MeV Al ion irradiated Ti–6Al–4V, D.L. Plumton, G.L. Kulcinski and R.A. Dodd 144 (1987) 264
Short range ordering of Au–Ag alloys by low temperature electron irradiation (Letter to the Editors), R. Poerschke and H. Wollenberger 144 (1987) 278

Blistering of tantalum foils during alpha particle bombardment (Letter to the Editors), D. Ghose, S.R. Bhattacharya, D. Basu and S.B. Karmohapatro 144 (1987) 282
Ion-induced desorption of oxygen from solid surfaces (Letter to the Editors), E.V. Alonso, G. Zampieri, M. Abbate and O. Grizzi 144 (1987) 287
Thermal conductivity of pressed lithium hydride and tritide compacts (Letter to the Editors), F.J. Jelinek, R.T. Tsugawa and P.C. Souers 144 (1987) 290
Effects of neutron irradiation on polymer matrix composites at 5 K and at room temperature. I. Absorbed-dose calculation, S. Egusa, M.A. Kirk and R.C. Birtcher 148 (1987) 43
Effects of neutron irradiation on polymer matrix composites at 5 K and at room temperature. II. Degradation of mechanical properties, S. Egusa, M.A. Kirk and R.C. Birtcher 148 (1987) 53
Erosion yield of Ti from TiC-deposited graphite by hydrogen ion bombardment at high temperatures, S. Sukenobu, Y. Gomay, H. Ohno and K. Morita 148 (1987) 66
Hydrogen blistering and bubble formation in metallic glasses $Fe_{40}Ni_{40}P_{14}B_6$ and $Fe_{40}Ni_{38}Mo_4B_{18}$, A.K. Tyagi and R.V. Nandedkar 148 (1987) 72
Surface damage of metallic glasses by argon ion bombardment, A.K. Tyagi and R.V. Nandedkar 148 (1987) 76
Positron annihilation studies on alpha-irradiated and deformed niobium, S.V. Naidu, A. Sen Gupta and P. Sen 148 (1987) 86
A study of the precipitation of copper particles in a ferrite matrix, G.M. Worrall, J.T. Buswell, C.A. English, M.G. Hetherington and G.D.W. Smith 148 (1987) 107
Microstructural examination of several commercial alloys neutron irradiated to 100 dpa, D.S. Gelles 148 (1987) 136
Diffusion and γ'-precipitation in Ni(Al) alloys under proton irradiation, P. Jung, M.I. Ansari, H. Klein and D. Meertens 148 (1987) 148
Void formation and precipitation during electron-irradiation in austenitic stainless steels modified with Ti, Zr and V, K. Nakata, T. Kato and I. Masaoka 148 (1987) 185
Effects of irradiation on the fracture toughness of FBR structural materials, D.J. Michel and R.A. Gray 148 (1987) 194
Characterization and deuterium ion bombardment behaviour of titanium carbide coatings, R.P. Agarwala, A.K. Dua and B.M. Pande 148 (1987) 204
Effects of irradiation on low activation ferritic alloys, D.S. Gelles and M.L. Hamilton 148 (1987) 272
A third stage of irradiation creep involving its cessation at high neutron exposures, F.A. Garner, D.L. Porter and B.J. Makenas 148 (1987) 279
Neutron irradiation of Fe–Mn, Fe–Cr–Mn and Fe–Cr–Ni alloys and an explanation of their differences in swelling behavior, F.A. Garner, H.R. Brager, D.S. Gelles and J.M. McCarthy 148 (1987) 294
Densification of uranium dioxide at low burn-up, G.J. Small 148 (1987) 302
Pore structure in oxide films on irradiated and unirradiated zirconium alloys, B. Cox 148 (1987) 332
The collapse of defect cascades to dislocation loops, M.A. Kirk, I.M. Robertson, M.L. Jenkins, C.A. English, T.J. Black and J.S. Vetrano 149 (1987) 21
Neutron irradiation effects on fatigue crack propagation in Alloy 718 at 650°C (Letter to the Editors), H.H. Smith and D.J. Michel 149 (1987) 109
Isochronal recovery and damage rate measurements in electron-irradiated dilute NiGe, A. Bartels, F. Dworschak and M. Weigert 149 (1987) 160
Effects of irradiation on ferritic alloys and implications for fusion reactor applications, D.S. Gelles 149 (1987) 192
Neutron irradiation damage in 64% cold-worked titanium, M. Griffiths, C.D. Cann and R.C. Styles 149 (1987) 200
Impurity generation due to non-thermal electrons and its control by external bias, S. Takamura, A. Sato, Y. Shen and T. Okuda 149 (1987) 212
Critical helium fluence for hydrogen trapping in pre-damaged stainless steel, M. Ogawa, K. Saneyoshi, Y. Takagi, A. Shirota and Y. Suzawa 149 (1987) 247
Helium flux to grain boundaries during irradiation (Letter to the Editors), A.J.E. Foreman and B.N. Singh 149 (1987) 266
Observation of shape change in the Raman spectrum of graphite exposed to deuterium glow (Letter to the Editors), M. Kitajima, K. Aoki and M. Okada 149 (1987) 269
Growth of inert gas bubbles after implantation, N. Marochov, L.J. Perryman and P.J. Goodhew 149 (1987) 296
Effect of nickel content of 9Cr–1MoVNb and 12Cr–1MoVW steels on the aging and irradiation response of impact properties, W.R. Corwin, J.M. Vitek and R.L. Klueh 149 (1987) 312
Zones of radiation point defect instability

near the [100] (010) edge dislocation in α-Fe, V.V. Kolomytkin 149 (1987) 321
Effect of helium on the deformation mode for Ti–7.5Al alloy, Y. Higashiguchi, Y. Suzuki, E. Yagi, M. Narui and H. Kayano 149 (1987) 328
Recovery behavior in neutron irradiated β-SiC, T. Suzuki, T. Maruyama, T. Iseki, T. Mori and M. Ito 149 (1987) 334
Development of a further-miniaturized specimen of 3 mm diameter for TEM disk (3 mm) small punch tests, X. Mao and H. Takahashi 150 (1987) 42
Phase instability, decomposition and redistribution of intermetallic precipitates in Zircaloy-2 and -4 during neutron irradiation, M. Griffiths, R.W. Gilbert and G.J.C. Carpenter 150 (1987) 53
Precipitate stability in β-quenched Zircaloy-4 irradiated by nitrogen-ions at 470°C, T.Y. Yang, G.P. Yu and L.J. Chen 150 (1987) 67
On accurate expressions for the critical quantities for cavity swelling (Letter to the Editors), L.K. Mansur 150 (1987) 105
Microstructure and properties of copper alloys following 14-MeV neutron irradiation, S.J. Zinkle 150 (1987) 140
Neutron damage in zirconium alloys irradiated at 644 to 710 K, M. Griffiths, R.W. Gilbert, V. Fidleris, R.P. Tucker and R.B. Adamson 150 (1987) 159
The formation of *c*-component defects in zirconium alloys during neutron irradiation, M. Griffiths and R.W. Gilbert 150 (1987) 169
Volume change of Al_2O_3 and $MgAl_2O_4$ induced by 14-MeV neutron irradiation, K. Tanimura, N. Itoh and F.W. Clinard 150 (1987) 182
Solute segregation along non-migrated and migrated grain boundaries during electron irradiation in austenitic stainless steels, K. Nakata and I. Masaoka 150 (1987) 186
Small punch tests for evaluating ductile–brittle transition behavior of irradiated ferritic steels, T. Misawa, T. Adachi, M. Saito and Y. Hamaguchi 150 (1987) 194
Irradiation behavior of low-enriched U_6Fe–Al dispersion fuel elements (Letter to the Editors), G.L. Hofman, R.F. Domagala and G.L. Copeland 150 (1987) 238
Postirradiation tensile behavior of nickel-doped ferritic steels, R.L. Klueh and J.M. Vitek 150 (1987) 272
Isothermal release of tritium from neutron-irradiated $Li_{17}Pb_{83}$, Y. Shibuya, M. Aida, Y. Fujii and M. Okamoto 150 (1987) 286
Sputtering yield of $Ti_{1-x}B_x$ films by 2 keV deuterium bombardment, T. Shikama, Y. Sakai and M. Okada 150 (1987) 302
The effects of intergranular constraints on irradiation growth of Zircaloy-2 at 320 K, R.A. Holt and A.R. Causey 150 (1987) 306
Irradiation growth in deformed zirconium, R.H. Zee, G.J.C. Carpenter, A. Rogerson and J.F. Watters 150 (1987) 319
Chemical enhancement of secondary ion emission from Cd^+ ion bombarded Mo, Ti, Al and Cu surfaces, N. Ray, P. Chakraborty and S.D. Dey 150 (1987) 331

Kinetics

Reactions of cesium with nonstoichiometric UO_{2+x} and $U_{0.86}Gd_{0.14}O_{2\pm x}$ pellets, K. Une 144 (1987) 128
Short range ordering of Au–Ag alloys by low temperature electron irradiation (Letter to the Editors), R. Poerschke and H. Wollenberger 144 (1987) 278
Grain growth in high density UO_2 (Letter to the Editors), F. Glodeanu, I. Furtuna, A. Paraschiv and M. Paraschiv 148 (1987) 351
On the oxidation of zirconium by heat tinting, I.A. El-Shanshoury, A.V. Chirkin and A. El-Yazgi 149 (1987) 74

Liquid Metals

Effects of stagnant liquid rubidium and the Rb–5 wt% O system on a stainless steel at 473 K (Letter to the Editors), T. Suzuki, K. Ohno, S. Masuda, Y. Nakanishi and Y. Matsui 148 (1987) 230
Activation product transport in FLiBe–vanadium alloy–HT9 system, A.C. Klein and D.-K. Sze 149 (1987) 261

Mechanical Properties

Effects of carburization and aging on the tensile properties of an experimental Ni–Cr–W superalloy, M. Shindo and H. Nakajima 144 (1987) 20
Influence des recuits sur l'évolution des propriétés mécaniques et de la résistivité électrique a 4.2 K du zirconium dopé en oxygène, M. Viltange, M.P. Biget et O. Dimitrov 144 (1987) 65
An analytical model for the ductile failure of biaxially loaded type 316 stainless steel subjected to thermal transients, R.J. DiMelfi 144 (1987) 171
The elastic anistropy of polycrystalline aggregates of zirconium and its alloys, C.M. Sayers 144 (1987) 211
Microstructure–mechanical property relations in HT-9, G.R. Odette, G.E. Lucas and R. Maiti 148 (1987) 22

Effects of neutron irradiation on polymer matrix composites at 5 K and at room temperature. II. Degradation of mechanical properties, S. Egusa, M.A. Kirk and R.C. Birtcher 148 (1987) 53
Deformation of polycrystalline Li_2O, K.C. Goretta, D.S. Applegate, R.B. Poeppel, M.C. Billone and J.L. Routbort 148 (1987) 166
On the anisotropy of zirconium and its alloys with niobium, A.V. Chirkin, N.R. Gajum, A.I. Ben Shaban and K. Kher Ramadan 148 (1987) 171
Determination of dynamic Young's modulus, shear modulus, and Poisson's ratio as a function of temperature for depleted uranium–0.75 wt% titanium using the piezoelectric ultrasonic composite oscillator technique, K.H. Keene, J.T. Hartman, Jr., A. Wolfenden and G.M. Ludtka 149 (1987) 218
Mechanical and fracture toughness properties of an irradiated 20MnMoNi55 pressure vessel steel weld (Letter to the Editors), M.M. Ghoniem, D. Pachur and F.H. Hammad 149 (1987) 272
A study on the mechanism of iodine-induced stress-corrosion cracking of Zircaloy-4, K.-N. Choo, S.-I. Pyun and J.-K. Choi 149 (1987) 289
Effect of nickel content of 9Cr–1MoVNb and 12Cr–1MoVW steels on the aging and irradiation response of impact properties, W.R. Corwin, J.M. Vitek and R.L. Klueh 149 (1987) 312
Work softening behaviour in cold drawn oxygen-free high conductivity copper for fusion reactor use, G. Piatti and H.A. Weir 150 (1987) 1
Development of a further-miniaturized specimen of 3 mm diameter for TEM disk (3 mm) small punch tests, X. Mao and H. Takahashi 150 (1987) 42
Small punch tests for evaluating ductile–brittle transition behavior of irradiated ferritic steels, T. Misawa, T. Adachi, M. Saito and Y. Hamaguchi 150 (1987) 194
Postirradiation tensile behavior of nickel-doped ferritic steels, R.L. Klueh and J.M. Vitek 150 (1987) 272
Effect of specimen size on the ductile–brittle transition behavior and the fracture sequence of 9Cr–W steels, F. Abe, T. Noda, H. Araki, M. Okada, M. Narui and H. Kayano 150 (1987) 292
The effects of intergranular constraints on irradiation growth of Zircaloy-2 at 320 K, R.A. Holt and A.R. Causey 150 (1987) 306

Microstructure *(incl. Textures)*

Neutron damage microstructures of high-conductivity copper alloys, R.J. Livak, T.G. Zocco and L.W. Hobbs 144 (1987) 121
Phase equilibria and thermodynamics of the Pu–O system: 1400 K to 1610 K, T.M. Besmann 144 (1987) 141
First observations of microstructural changes in delta Pu by transmission electron microscopy (Letter to the Editors), D.L. Rohr and K.P. Staudhammer 144 (1987) 202
Evidence of pyramidal slip mode in cold-rolled Zircaloy-4 sheets (Letter to the Editors), P. Merle 144 (1987) 275
Microstructure–mechanical property relations in HT-9, G.R. Odette, G.E. Lucas and R. Maiti 148 (1987) 22
An examination of twinning in α-neptunium, M.F. Stevens 148 (1987) 99
Microstructural examination of several commercial alloys neutron irradiated to 100 dpa, D.S. Gelles 148 (1987) 136
Phase identification, microstructural characterization, phase microanalyses and leaching performance evaluation of SYNROC-FA crystalline ceramic waste form, A.G. Solomah, P.G. Richardson and A.K. McIlwain 148 (1987) 157
Creep and microstructural changes in dispersion hardened Ni–20% Cr–1% ThO_2 during proton irradiation, P. Jung and P.B. Chilson 149 (1987) 1
Fatigue-crack propagation behavior of HT-9 steel, L.A. James 149 (1987) 138
Precipitate stability in β-quenched Zircaloy-4 irradiated by nitrogen-ions at 470°C, T.Y. Yang, G.P. Yu and L.J. Chen 150 (1987) 67
Neutron diffraction study of age-hardened U–0.75 wt% Ti alloy, C.S. Choi, H.J. Prask and G.M. Ludtka 150 (1987) 85
Microstructure and properties of copper alloys following 14-MeV neutron irradiation, S.J. Zinkle 150 (1987) 140
Neutron damage in zirconium alloys irradiated at 644 to 710 K, M. Griffiths, R.W. Gilbert, V. Fidleris, R.P. Tucker and R.B. Adamson 150 (1987) 159
Solute segregation along non-migrated and migrated grain boundaries during electron irradiation in austenitic stainless steels, K. Nakata and I. Masaoka 150 (1987) 186

Monitoring Methods

Acoustic emission from low temperature phase transformations in plutonium, C.R. Heiple and S.H. Carpenter 149 (1987) 168

Phase Transformations

Characterisation of uranium oxides by

micro-Raman spectroscopy, G.C. Allen, I.S. Butler and N. Anh Tuan 144 (1987) 17
Phase equilibria and thermodynamics of the Pu–O system: 1400 K to 1610 K, T.M. Besmann 144 (1987) 141
Phase transformations in ion irradiated Ti–6242s alloys, D.L. Plumton, G.L. Kulcinski and R.A. Dodd 144 (1987) 252
Radiation induced precipitation in 9 MeV Al ion irradiated Ti–6Al–4V, D.L. Plumton, G.L. Kulcinski and R.A. Dodd 144 (1987) 264
The influence of temperature on void-lattice formation and swelling, C.H. Woo and W. Frank 148 (1987) 121
Diffusion and γ'-precipitation in Ni(Al) alloys under proton irradiation, P. Jung, M.I. Ansari, H. Klein and D. Meertens 148 (1987) 148
The possible influence of order–disorder transformations on the swelling of 85Ni–15Cr nichrome alloy, F.A. Garner 148 (1987) 288
Neutron irradiation of Fe–Mn, Fe–Cr–Mn and Fe–Cr–Ni alloys and an explanation of their differences in swelling behavior, F.A. Garner, H.R. Brager, D.S. Gelles and J.M. McCarthy 148 (1987) 294
Acoustic emission from low temperature phase transformations in plutonium, C.R. Heiple and S.H. Carpenter 149 (1987) 168
Phase instability, decomposition and redistribution of intermetallic precipitates in Zircaloy-2 and -4 during neutron irradiation, M. Griffiths, R.W. Gilbert and G.J.C. Carpenter 150 (1987) 53
Precipitate stability in β-quenched Zircaloy-4 irradiated by nitrogen-ions at 470°C, T.Y. Yang, G.P. Yu and L.J. Chen 150 (1987) 67
Neutron diffraction study of age-hardened U–0.75 wt% Ti alloy, C.S. Choi, H.J. Prask and G.M. Ludtka 150 (1987) 85

Physical Properties

Magnetochemistry and crystal chemistry of ternary actinoidmetal-silicides {Th, U}-{Cu, Ru, Os, Ir, Pt}$_2$Si$_2$ (Letter to the Editors), K. Hiebl and P. Rogl 144 (1987) 193
Phase transition temperature in Zircaloy-2 (Letter to the Editors), D. Arias and R. Castillo Guerra 144 (1987) 196
Recovery of electrical resistivity in neutron irradiated steels (Letter to the Editors), S. Takamura, K. Kitajima and H. Abe 144 (1987) 205
Radiation induced precipitation in 9 MeV Al ion irradiated Ti–6Al–4V, D.L. Plumton, G.L. Kulcinski and R.A. Dodd 144 (1987) 264
Short range ordering of Au–Ag alloys by low temperature electron irradiation (Letter to the Editors), R. Poerschke and H. Wollenberger 144 (1987) 278
Acoustic emission caused by reversed plastic deformation in polycrystalline graphite, I. Ioka and S. Yoda 148 (1987) 344
Thermal expansion of Synroc minerals (Letter to the Editors), R.B. Roberts, G.K. White, W.J. Buykx and D.J. Cassidy 148 (1987) 353
The dielectric constant of UO_2 below the Néel point, N. Hampton, G.A. Saunders, J.H. Harding and A.M. Stoneham 149 (1987) 18
Isochronal recovery and damage rate measurements in electron-irradiated dilute NiGe, A. Bartels, F. Dworschak and M. Weigert 149 (1987) 160
The pressure dependence of the dielectric constant and electrical conductivity of single crystal uranium dioxide, R.N. Hampton, G.A. Saunders, J.H. Harding and A.M. Stoneham 150 (1987) 17
Volume change of Al_2O_3 and $MgAl_2O_4$ induced by 14-MeV neutron irradiation, K. Tanimura, N. Itoh and F.W. Clinard 150 (1987) 182

Plutonium, Plutonium Alloys and Compounds

Phase equilibria and thermodynamics of the Pu–O system: 1400 K to 1610 K, T.M. Besmann 144 (1987) 141
First observations of microstructural changes in delta Pu by transmission electron microscopy (Letter to the Editors), D.L. Rohr and K.P. Staudhammer 144 (1987) 202
Oxidation of plutonium–1 wt% gallium in nitrogen/5.5% oxygen atmospheres (Letter to the Editors), J.L. Stakebake and L.A. Lewis 148 (1987) 115
Étude de la diffusion chimique de l'oxygène dans $(U_{0,8}Pu_{0,2})O_{2-x}$ à 1400°C (Letter to the Editors), R. Ducroux, A.S. Bayoglu, M. Fromont and R. Lorenzelli 149 (1987) 101
Acoustic emission from low temperature phase transformations in plutonium, C.R. Heiple and S.H. Carpenter 149 (1987) 168
Phase equilibria and crystal structures in the ternary systems: actinoid metal–transition metal–boron. I. Plutonium-borides with the $LuRuB_2$-type of structure, P. Rogl, P.E. Potter and H.R. Haines 149 (1987) 283
The OXIRED model for redistribution of oxygen in nonstoichiometric uranium–plutonium oxides, K. Lassmann 150 (1987) 10

Pore Behaviour

A simplified model for stable open porosity, F.A. Nichols 148 (1987) 92
On diffusion and precipitation of gas-in-solid, C. Ronchi 148 (1987) 316
Pore structure in oxide films on irradiated and unirradiated zirconium alloys, B. Cox 148 (1987) 332

Annealing behavior of krypton-implanted aluminum. I. Diffraction effects from krypton bubbles, I. Hashimoto, H. Yorikawa, H. Mitsuya, H. Yamaguchi, K. Takaishi, T. Kikuchi, K. Furuya, E. Yagi and M. Iwaki 149 (1987) 69
On the rate determining step in fission gas release from high burn-up water reactor fuel during power transients, C.T. Walker and M. Mogensen 149 (1987) 121

Powder Processes and Products

Sintering behavior of sol–gel ThO_2 microspheres, S. Yamagishi and Y. Takahashi 144 (1987) 244
Production of uranium metal using a thermal plasma (Letter to the Editors), R.C. Burk 149 (1987) 103

Recrystallization, Recovery and Grain Growth

Work softening behaviour in cold drawn oxygen-free high conductivity copper for fusion reactor use, G. Piatti and H.A. Weir 150 (1987) 1

Refractory Metals and Alloys *(excl. Zr)*

The interaction between nitrogen and vacancies in molybdenum observed with thermal helium desorption spectrometry, H.A. Filius and A. Van Veen 144 (1987) 1
The oxidation of uranium–0.75 wt% titanium in environments containing oxygen and/or water vapor at 140°C, C.J. Greenholt and L.J. Weirick 144 (1987) 110
Phase transformations in ion irradiated Ti–6242s alloys, D.L. Plumton, G.L. Kulcinski and R.A. Dodd 144 (1987) 252
Radiation induced precipitation in 9 MeV Al ion irradiated Ti–6Al–4V, D.L. Plumton, G.L. Kulcinski and R.A. Dodd 144 (1987) 264
Blistering of tantalum foils during alpha particle bombardment (Letter to the Editors), D. Ghose, S.R. Bhattacharya, D. Basu and S.B. Karmohapatro 144 (1987) 282
A TEM study of helium trapping in cold worked single crystalline molybdenum, W.Th.M. Buters, J.H. Evans, A. Van Veen and A. Van den Beukel 148 (1987) 17
Characterization and deuterium ion bombardment behaviour of titanium carbide coatings, R.P. Agarwala, A.K. Dua and B.M. Pande 148 (1987) 204
Diffusion and trapping of ion-implanted helium in nickel, M.B. Lewis 149 (1987) 143
Neutron irradiation damage in 64% cold-worked titanium, M. Griffiths, C.D. Cann and R.C. Styles 149 (1987) 200

Safety – Nuclear Reactors

Fuel morphology effects on the chemical form of iodine release from severely damaged fuel, A.W. Cronenberg and D.J. Osetek 149 (1987) 252

Sodium

Corrosion resistance of ion-plated molybdenum thin-coating of austenitic steel in a flowing sodium environment, T. Suzuki, I. Mutoh and M. Fukutomi 144 (1987) 29
Phase relations for reactions of hydrogen with sodium oxide between 500 and 900°C, E. Veleckis and L. Leibowitz 144 (1987) 235
Compatibility of high-purity Fe–(5 to 15)Cr–1Mo ferritic steels in a sodium environment, T. Suzuki and I. Mutoh 149 (1987) 41
Carbon potential and carbide equilibrium in 18/8 austenitic steels, S. Rajendran Pillai and C.K. Mathews 150 (1987) 31

Steels

Corrosion resistance of ion-plated molybdenum thin-coating of austenitic steel in a flowing sodium environment, T. Suzuki, I. Mutoh and M. Fukutomi 144 (1987) 29
A novel determination of thermodynamic activities of metals in an AISI 316 stainless steel by a metastable emf method, A.M. Azad, O.M. Sreedharan and J.B. Gnanamoorthy 144 (1987) 94
An analytical model for the ductile failure of biaxially loaded type 316 stainless steel subjected to thermal transients, R.J. DiMelfi 144 (1987) 171
Recovery of electrical resistivity in neutron irradiated steels (Letter to the Editors), S. Takamura, K. Kitajima and H. Abe 144 (1987) 205
Microstructure–mechanical property relations in HT-9, G.R. Odette, G.E. Lucas and R. Maiti 148 (1987) 22
Microstructural examination of several commercial alloys neutron irradiated to 100 dpa, D.S. Gelles 148 (1987) 136
Void formation and precipitation during electron-irradiation in austenitic stainless steels modified with Ti, Zr and V, K. Nakata, T. Kato and I. Masaoka 148 (1987) 185
Effects of irradiation on the fracture toughness of FBR structural materials, D.J. Michel and R.A. Gray 148 (1987) 194
Effects of stagnant liquid rubidium and the Rb–5 wt% O system on a stainless steel at 473 K (Letter to the Editors), T. Suzuki, K. Ohno, S. Masuda, Y. Nakanishi and Y. Matsui 148 (1987) 230
Effects of irradiation on low activation ferritic alloys, D.S. Gelles and M.L. Hamilton 148 (1987) 272

A third stage of irradiation creep involving its cessation at high neutron exposures, F.A. Garner, D.L. Porter and B.J. Makenas 148 (1987) 279
The possible influence of order–disorder transformations on the swelling of 85Ni–15Cr nichrome alloy, F.A. Garner 148 (1987) 288
Neutron irradiation of Fe–Mn, Fe–Cr–Mn and Fe–Cr–Ni alloys and an explanation of their differences in swelling behavior, F.A. Garner, H.R. Brager, D.S. Gelles and J.M. McCarthy 148 (1987) 294
Characterisation of the activities associated with fast reactor cladding hulls, P. Biddle and J.H. Rees 149 (1987) 7
Compatibility of high-purity Fe–(5 to 15)Cr–1Mo ferritic steels in a sodium environment, T. Suzuki and I. Mutoh 149 (1987) 41
Fatigue-crack propagation behavior of HT-9 steel, L.A. James 149 (1987) 138
Hydrogen in 304 steel: diffusion, permeation and surface reaction, D.M. Grant, D.L. Cummings and D.A. Blackburn 149 (1987) 180
Effects of irradiation on ferritic alloys and implications for fusion reactor applications, D.S. Gelles 149 (1987) 192
Critical helium fluence for hydrogen trapping in pre-damaged stainless steel, M. Ogawa, K. Saneyoshi, Y. Takagi, A. Shirota and Y. Suzawa 149 (1987) 247
Mechanical and fracture toughness properties of an irradiated 20MnMoNi55 pressure vessel steel weld (Letter to the Editors), M.M. Ghoniem, D. Pachur and F.H. Hammad 149 (1987) 272
Effect of nickel content of 9Cr–1MoVNb and 12Cr–1MoVW steels on the aging and irradiation response of impact properties, W.R. Corwin, J.M. Vitek and R.L. Klueh 149 (1987) 312
Evaluation of ageing-induced embrittlement in an austenitic stainless steel by instrumented impact testing, K.G. Samuel, P.R. Sreenivasan, S.K. Ray and P. Rodriguez 150 (1987) 78
Solute segregation along non-migrated and migrated grain boundaries during electron irradiation in austenitic stainless steels, K. Nakata and I. Masaoka 150 (1987) 186
Small punch tests for evaluating ductile–brittle transition behavior of irradiated ferritic steels, T. Misawa, T. Adachi, M. Saito and Y. Hamaguchi 150 (1987) 194
Postirradiation tensile behavior of nickel-doped ferritic steels, R.L. Klueh and J.M. Vitek 150 (1987) 272
Effect of specimen size on the ductile–brittle transition behavior and the fracture sequence of 9Cr–W steels, F. Abe, T. Noda, H. Araki, M. Okada, M. Narui and H. Kayano 150 (1987) 292

Structural Materials

Effects of carburization and aging on the tensile properties of an experimental Ni–Cr–W superalloy, M. Shindo and H. Nakajima 144 (1987) 20
Creep and microstructural changes in dispersion hardened Ni–20% Cr–1% ThO_2 during proton irradiation, P. Jung and P.B. Chilson 149 (1987) 1
Effect of helium on the deformation mode for Ti–7.5Al alloy, Y. Higashiguchi, Y. Suzuki, E. Yagi, M. Narui and H. Kayano 149 (1987) 328
Strain-time effects in low-cycle fatigue of nickel-base heat-resistant alloys at high temperature, H. Tsuji and T. Kondo 150 (1987) 259

Swelling

The influence of temperature on void-lattice formation and swelling, C.H. Woo and W. Frank 148 (1987) 121
A third stage of irradiation creep involving its cessation at high neutron exposures, F.A. Garner, D.L. Porter and B.J. Makenas 148 (1987) 279
Neutron irradiation of Fe–Mn, Fe–Cr–Mn and Fe–Cr–Ni alloys and an explanation of their differences in swelling behavior, F.A. Garner, H.R. Brager, D.S. Gelles and J.M. McCarthy 148 (1987) 294
On accurate expressions for the critical quantities for cavity swelling (Letter to the Editors), L.K. Mansur 150 (1987) 105

Thermodynamic Properties

Effect of oxygen and nitrogen impurities on the thermodynamic properties of uranium–plutonium mixed carbide fuel, M. Saibaba, S. Vana Varamban and C.K. Mathews 144 (1987) 56
A novel determination of thermodynamic activities of metals in an AISI 316 stainless steel by a metastable emf method, A.M. Azad, O.M. Sreedharan and J.B. Gnanamoorthy 144 (1987) 94
Phase equilibria and thermodynamics of the Pu–O system: 1400 K to 1610 K, T.M. Besmann 144 (1987) 141
Thermodynamic studies of the solubility and of the diffusion of sulfur in Ni–15Cr–10Fe alloy, H. Talah, N. Barbouth and P. Marcus 148 (1987) 61
Surface energy measurements on UO_2 – A critical review, R.O.A. Hall, M.J. Mortimer and D.A. Mortimer 148 (1987) 237

Thermodynamic study of UO_{2+x} by solid state emf technique, A. Nakamura and T. Fujino 149 (1987) 80
Vaporisation thermodynamics of the nickel-rich phases in the Ni–Te binary system – A high temperature mass spectrometric study, R. Viswanathan, M. Sai Baba, D. Darwin Albert Raj, R. Balasubramanian, B. Saha and C.K. Mathews 149 (1987) 302
Heat capacity measurement of $U_{1-y}Gd_yO_2$ ($0.00 \leqslant y \leqslant 0.142$) from 310 to 1500 K, H. Inaba, K. Naito and M. Oguma 149 (1987) 341
The OXIRED model for redistribution of oxygen in nonstoichiometric uranium–plutonium oxides, K. Lassmann 150 (1987) 10
Carbon potential and carbide equilibrium in 18/8 austenitic steels, S. Rajendran Pillai and C.K. Mathews 150 (1987) 31
Effects of additives and the oxygen potential on the fission gas diffusion in UO_2 fuel, K. Une, I. Tanabe and M. Oguma 150 (1987) 93
Stability of ternary oxygen compounds of molybdenum in liquid sodium, T. Gnanasekaran, K.H. Mahendran, G. Periaswami, C.K. Mathews and H.U. Borgstedt 150 (1987) 113
Kinetics of the carbothermic reduction of a $ThO_2 + UO_2 + C$ mixture to prepare (Th, U)C, T. Namba, T. Koyama, G. Imada, M. Kanno and M. Yamawaki 150 (1987) 226
The vapor pressure of liquid UO_2 up to the critical temperature (Letter to the Editors), M. Hoch 150 (1987) 339

Thermophysical Properties

Thermal conductivity of pressed lithium hydride and tritide compacts (Letter to the Editors), F.J. Jelinek, R.T. Tsugawa and P.C. Souers 144 (1987) 290
Tritium compatibility measurements of turbomolecular pump oil in a miniaturised viscosimeter, R. Lässer, K.-H. Klatt, D. Triefenbach and J.L. Hemmerich 148 (1987) 145
Thermal desorption of deuterium from graphite doped with iron, K. Ashida, K. Ichimura, M. Matsuyama and K. Watanabe 148 (1987) 217
Vaporisation thermodynamics of the nickel-rich phases in the Ni–Te binary system – A high temperature mass spectrometric study, R. Viswanathan, M. Sai Baba, D. Darwin Albert Raj, R. Balasubramanian, B. Saha and C.K. Mathews 149 (1987) 302
Electrical conductivity of near-stoichiometric (U, Gd)O_2 solid solutions, Y. Arai, T. Ohmichi, S. Fukushima and M. Handa 150 (1987) 233
Beiträge zur phänomenologischen Beschreibung der Kinetik von Oberflächenprozessen für das System Gas–Festkörper, H.J. Leyers 150 (1987) 281
The effects of intergranular constraints on irradiation growth of Zircaloy-2 at 320 K, R.A. Holt and A.R. Causey 150 (1987) 306

Thorium, Thorium Alloys and Compounds

Lattice and grain boundary diffusion in polycrystalline thoria–urania, D.R. Olander 144 (1987) 105
Magnetochemistry and crystal chemistry of ternary actinoidmetal-silicides {Th, U}-{Cu, Ru, Os, Ir, Pt}$_2$Si$_2$ (Letter to the Editors), K. Hiebl and P. Rogl 144 (1987) 193
Sintering behavior of sol–gel ThO_2 microspheres, S. Yamagishi and Y. Takahashi 144 (1987) 244
Kinetics of the carbothermic reduction of a $ThO_2 + UO_2 + C$ mixture to prepare (Th, U)C, T. Namba, T. Koyama, G. Imada, M. Kanno and M. Yamawaki 150 (1987) 226

Tritium

Release of tritium from yttrium and its alloys in a gas stream, M. Tanase and P.W. Fisher 144 (1987) 151
Tritium compatibility measurements of turbomolecular pump oil in a miniaturised viscosimeter, R. Lässer, K.-H. Klatt, D. Triefenbach and J.L. Hemmerich 148 (1987) 145
Chemical behaviors of tritium formed in a LiF–BeF_2 mixture, H. Moriyama, S. Maeda, T. Ohmura, K. Moritani and J. Oishi 148 (1987) 211
Shrinkage and opacity of 100 kg/m^3 silica aerogel foam in liquid deuterium–tritium (Letter to the Editors), E.M. Fearon, P.R. Coronado, R.G. Garza, D.H. Darling and P.C. Souers 149 (1987) 105
Tritium release from neutron-irradiated Li_2O: Diffusion in single crystal, T. Tanifuji, K. Noda, T. Takahashi and H. Watanabe 149 (1987) 227
Incident angle dependence of sputtering yields for hydrogen bombardment of light elements, W. Eckstein, A. Sagara and K. Kamada 150 (1987) 266
Isothermal release of tritium from neutron-irradiated $Li_{17}Pb_{83}$, Y. Shibuya, M. Aida, Y. Fujii and M. Okamoto 150 (1987) 286

Uranium and Uranium Alloys

The oxidation of uranium–0.75 wt% titanium in environments containing oxygen and/or water vapor at 140°C, C.J. Greenholt and L.J. Weirick 144 (1987) 110
Magnetochemistry and crystal chemistry of ternary actinoidmetal-silicides {Th, U}-{Cu, Ru, Os, Ir, Pt}$_2$Si$_2$ (Letter to the Editors), K. Hiebl and P. Rogl 144 (1987) 193

Production of uranium metal using a thermal plasma (Letter to the Editors), R.C. Burk 149 (1987) 103
Determination of dynamic Young's modulus, shear modulus, and Poisson's ratio as a function of temperature for depleted uranium–0.75 wt% titanium using the piezoelectric ultrasonic composite oscillator technique, K.H. Keene, J.T. Hartman, Jr., A. Wolfenden and G.M. Ludtka 149 (1987) 218
Neutron diffraction study of age-hardened U–0.75 wt% Ti alloy, C.S. Choi, H.J. Prask and G.M. Ludtka 150 (1987) 85
Irradiation behavior of low-enriched U_6Fe–Al dispersion fuel elements (Letter to the Editors), G.L. Hofman, R.F. Domagala and G.L. Copeland 150 (1987) 238

Uranium Ceramics
Characterisation of uranium oxides by micro-Raman spectroscopy, G.C. Allen, I.S. Butler and N. Anh Tuan 144 (1987) 17
Lattice and grain boundary diffusion in polycrystalline thoria–urania, D.R. Olander 144 (1987) 105
Reactions of cesium with nonstoichiometric UO_{2+x} and $U_{0.86}Gd_{0.14}O_{2\pm x}$ pellets, K. Une 144 (1987) 128
Surface energy measurements on UO_2 – A critical review, R.O.A. Hall, M.J. Mortimer and D.A. Mortimer 148 (1987) 237
Densification of uranium dioxide at low burn-up, G.J. Small 148 (1987) 302
On diffusion and precipitation of gas-in-solid, C. Ronchi 148 (1987) 316
A study of chemical parameters of the internal gelation based sol–gel process for uranium dioxide, V.N. Vaidya, S.K. Mukerjee, J.K. Joshi, R.V. Kamat and D.D. Sood 148 (1987) 324
Grain growth in high density UO_2 (Letter to the Editors), F. Glodeanu, I. Furtuna, A. Paraschiv and M. Paraschiv 148 (1987) 351
The dielectric constant of UO_2 below the Néel point, N. Hampton, G.A. Saunders, J.H. Harding and A.M. Stoneham 149 (1987) 18
Survey of the power ramp performance testing of KWU's PWR UO_2 fuel, M. Gärtner and G. Fischer 149 (1987) 29
Thermodynamic study of UO_{2+x} by solid state emf technique, A. Nakamura and T. Fujino 149 (1987) 80
Étude de la diffusion chimique de l'oxygène dans $(U_{0,8}Pu_{0,2})O_{2-x}$ à 1400°C (Letter to the Editors), R. Ducroux, A.S. Bayoglu, M. Fromont and R. Lorenzelli 149 (1987) 101
On the rate determining step in fission gas release from high burn-up water reactor fuel during power transients, C.T. Walker and M. Mogensen 149 (1987) 121
Heat capacity measurement of $U_{1-y}Gd_yO_2$ ($0.00 \leqslant y \leqslant 0.142$) from 310 to 1500 K, H. Inaba, K. Naito and M. Oguma 149 (1987) 341
The OXIRED model for redistribution of oxygen in nonstoichiometric uranium–plutonium oxides, K. Lassmann 150 (1987) 10
The pressure dependence of the dielectric constant and electrical conductivity of single crystal uranium dioxide, R.N. Hampton, G.A. Saunders, J.H. Harding and A.M. Stoneham 150 (1987) 17
Effects of additives and the oxygen potential on the fission gas diffusion in UO_2 fuel, K. Une, I. Tanabe and M. Oguma 150 (1987) 93
Kinetics of the carbothermic reduction of a $ThO_2 + UO_2 + C$ mixture to prepare (Th, U)C, T. Namba, T. Koyama, G. Imada, M. Kanno and M. Yamawaki 150 (1987) 226
Electrical conductivity of near-stoichiometric (U, Gd)O_2 solid solutions, Y. Arai, T. Ohmichi, S. Fukushima and M. Handa 150 (1987) 233
The vapor pressure of liquid UO_2 up to the critical temperature (Letter to the Editors), M. Hoch 150 (1987) 339

Void Formation
Blistering of tantalum foils during alpha particle bombardment (Letter to the Editors), D. Ghose, S.R. Bhattacharya, D. Basu and S.B. Karmohapatro 144 (1987) 282
The influence of temperature on void-lattice formation and swelling, C.H. Woo and W. Frank 148 (1987) 121
Crack tip stress intensity factor changes arising from voids, gas filled bubbles and microcracks in irradiated materials, J. Weertman 149 (1987) 150
Annealing behavior of krypton-implanted aluminum. II. SEM study on surface strucure during emission of krypton atoms, I. Hashimoto, H. Yorikawa, H. Mitsuya, H. Yamaguchi, K. Furuya, E. Yagi and M. Iwaki 150 (1987) 100

Wastes *(Radioactive)*
Phase identification, microstructural characterization, phase microanalyses and leaching performance evaluation of SYNROC-FA crystalline ceramic waste form, A.G. Solomah, P.G. Richardson and A.K. McIlwain 148 (1987) 157
Thermal expansion of Synroc minerals (Letter to the Editors), R.B. Roberts, G.K. White, W.J. Buykx and D.J. Cassidy 148 (1987) 353
Air contamination by cesium in a canister containing nuclear waste glass (Letter to the Editors), H. Kamizono, S. Kikkawa,

S. Tashiro, H. Nakamura and H. Kanazawa 149 (1987) 113
Preselection of Ni–Cr(–Mo) alloys as potential canister materials for vitrified high active nuclear waste by electrochemical testing, H. Bort, I. Wolf and S. Leistikow 149 (1987) 132

Zirconium, Zirconium Alloys and Compounds

Hydrogen and deuterium profiling at the surface of zirconium alloys. I. The effects of surface preparation, A. Stern, D. Khatamian, T. Laursen, G.C. Weatherly and J.M. Perz 144 (1987) 35
Influence des recuits sur l'évolution des propriétés mécaniques et de la résistivité électrique a 4.2 K du zirconium dopé en oxygène, M. Viltange, M.P. Biget et O. Dimitrov 144 (1987) 65
Phase transition temperature in Zircaloy-2 (Letter to the Editors), D. Arias and R. Castillo Guerra 144 (1987) 196
The elastic anistropy of polycrystalline aggregates of zirconium and its alloys, C.M. Sayers 144 (1987) 211
Evidence of pyramidal slip mode in cold-rolled Zircaloy-4 sheets (Letter to the Editors), P. Merle 144 (1987) 275
On the anisotropy of zirconium and its alloys with niobium, A.V. Chirkin, N.R. Gajum, A.I. Ben Shaban and K. Kher Ramadan 148 (1987) 171
The importance of oxygen to helium–defect trapping in zirconium, M.B. Lewis 148 (1987) 175
Composition of precipitates present in Zircaloy-2 and 4 (Letter to the Editors), D. Arias, T. Palacios and C. Turrillo 148 (1987) 227
Hydrogen and deuterium profiling at the surface of zirconium alloys. II. The effects of oxidation, A. Stern, D. Khatamian, T. Laursen, G.C. Weatherly and J.M. Perz 148 (1987) 257
Pore structure in oxide films on irradiated and unirradiated zirconium alloys, B. Cox 148 (1987) 332
c-component dislocations in Zr–2.5 wt% Nb alloy, R.A. Holt, M. Griffiths and R.W. Gilbert 149 (1987) 51
On the oxidation of zirconium by heat tinting, I.A. El-Shanshoury, A.V. Chirkin and A. El-Yazgi 149 (1987) 74
A study on the mechanism of iodine-induced stress-corrosion cracking of Zircaloy-4, K.-N. Choo, S.-I. Pyun and J.-K. Choi 149 (1987) 289
Phase instability, decomposition and redistribution of intermetallic precipitates in Zircaloy-2 and -4 during neutron irradiation, M. Griffiths, R.W. Gilbert and G.J.C. Carpenter 150 (1987) 53
Precipitate stability in β-quenched Zircaloy-4 irradiated by nitrogen-ions at 470°C, T.Y. Yang, G.P. Yu and L.J. Chen 150 (1987) 67
Neutron damage in zirconium alloys irradiated at 644 to 710 K, M. Griffiths, R.W. Gilbert, V. Fidleris, R.P. Tucker and R.B. Adamson 150 (1987) 159
The formation of *c*-component defects in zirconium alloys during neutron irradiation, M. Griffiths and R.W. Gilbert 150 (1987) 169
Atomic size and fast diffusion of metallic impurities in zirconium, R. Tendler and J.P. Abriata 150 (1987) 251
The effects of intergranular constraints on irradiation growth of Zircaloy-2 at 320 K, R.A. Holt and A.R. Causey 150 (1987) 306
Irradiation growth in deformed zirconium, R.H. Zee, G.J.C. Carpenter, A. Rogerson and J.F. Watters 150 (1987) 319

SUBJECT INDEX TO VOLUMES 141–143
(Proceedings of the Second International Conference on Fusion Reactor Materials, Chicago, IL, USA, April 13–17, 1986)

Activation 49, 1074, 1113
  calculations 49, 1074
  corrosion of low activation austenitic alloys by lithium 579
  cross section library 654
  martensitic stainless steels 1088
  vanadium 1113
Aging effects 453
Alloy design 1074
  low activation 1074
Aluminum 49
  600 MeV proton irradiation 743
  800 MeV proton irradiation 718
  aluminum matrix composites 96
  first wall 49, 743
  helium effects 672, 718, 743
  neutron irradiation 625
  proton irradiation 672
Aluminum alloys 718, 915
  Al–Mg, Al–Mg–V, and Al–Mg–Si properties 743
  Al–Mg–Li 915
Analytical electron microscopy
  segregation at grain boundaries 991
Armor 87
  C and SiC alloy 131
  coatings 131
  for Doublet III 131
  graphite 131
Auger spectroscopy
  segregation at grain boundaries 991
Austenitic steels 954, 1067

Barriers
  nucleation of He–V clusters 672
Beam profile monitoring 794
Bending properties of SiC/Ar composite material 96
Beryllium
  as energy multiplier 61
  cost–benefit analysis 61
  hydrogen permeation 221
  resource 61
  rotating target 1003
Blanket materials 3, 294
  beryllium, cost–benefit analysis 61
  compatibility with coolants 561, 571, 579, 592, 599, 604, 1117
  in-situ tritium recovery 265, 275, 316
  lithium aluminate 364
  lithium–lead 561, 571
  out of pile and in-situ tritium recovery 357
  post-irradiation tritium recovery 294
  radiation damage 275, 364, 444, 654, 690, 705, 921
  review 275, 1117
  solid breeder materials 265, 275, 294, 305, 316, 327, 334, 339, 353
  testing 10, 275, 282, 523
  water absorption 316, 327
Blistering
  C and SiC alloy 131
Boron
  doping 899
  helium production 899
Brazing
  graphite-to-metal 204
Bubbles 476, 486, 723
  at grain boundaries 476, 536, 672, 718, 743, 846
  formation and growth 491, 658, 672, 695, 705, 718, 723
  in aluminum 672, 718, 743
  in Al-alloys 718, 743

Carbides 148, 486
  precipitation in austenitic steels 754
  precipitation in Ti-modified stainless steels 754
  SiC 96
  SiC/SiC composite 148
Carbon 748
  as surface impurity on nickel 249
  effect on hydrogen permeation 249
  hydrocarbon production 108
Cascades 658, 665
  cascade overlap effect 860
  cascade particles 816
  cascade structure 841, 865
  computer simulation of 665, 841, 865
  effects on IIP 799
  effects on irradiated structure 625, 846, 860, 870, 874, 921
  effects on periodic structure 767
  fusion neutron 625
  interaction with dislocation 625
  modeling of precipitation under 682
  sub-cascade 625
Cavities 79, 163, 476, 536, 658, 723, 748
  austenitic alloys 763

bimodal size distribution 695, 705
bubble migration kinetics 727
copper alloys, neutron irradiated 79, 163
effects of helium 625, 647, 690, 705, 713, 743, 982
effects of oxygen 713
formation along fibers 96
formation by HVEM irradiation 763
formation of ion irradiation 690, 705, 713
formation in composite 96
formation with ion irradiation 723, 754
grain boundaries 536, 713, 727, 743
grain boundary embrittlement 476, 536, 672, 727, 743
growth behavior and mechanism 536, 713, 727
in stainless steel 647, 754
nucleation via stacking fault tetrahedra 763
oxygen effects 738
formation by fusion neutron irradiation 625
in stainless steel 690
microstructural correlation 690
vanadium alloys 982
Ceramics 148
applications in fusion systems 24, 38, 275
breeding materials 305, 327, 334, 339
compatibility with structural materials 289
fiber reinforced composite 96
large insulators 38
measurement of gas retention in 305
radation effects 387
SiC 102
SiC/SiC composite 148
Chemical erosion 87
C and SiC alloy 131
graphite 131, 139, 448
TiB_2 152
Chromium
helium generation 824
Coatings
boron compounds 156
C and SiC alloy 131
for limiters 204
for surface modification 604
plasma spray 204
thermal shock testing 204
TiC 152, 234
radiation hazard 24, 65
swelling predictions for 647
tritium permeation 275
radiation hazard 607
Compatibility
blanket and coolant compatibility 561, 571, 579, 584, 592, 599, 604, 1117
carbon, hydrogen and oxygen with structural materials 448
helium with refractory metals 599, 604
helium with structural materials 599, 604
lead–lithium with HT-9 592
lead–lithium with stainless steel 561, 571, 592
liquid metals with structural alloys 571, 592
lithium–Fe–Cr–Mn alloys 579
lithium–ferrous alloys 584
lithium–low activation austenitic alloys 579
lithium–stainless steels 571
lithium–structural materials 571
Pb–17Li with ferrous alloys 561, 566, 592
Composite materials 148
SiC/Al composite material 96
SiC/SiC composite 148
Contamination effects of oxygen on vanadium alloys 523, 599, 604
Coolants
compatibility 579, 584, 592, 604, 1117
tritium permeation into 275
Copper 79, 163, 665
copper alloys 79, 160, 163, 169, 174, 179, 188, 204, 548, 878, 883
copper alloys, ion damage 767
damage functions 665
dpa and He in various facilities 654, 665, 824
ductility 532
electrical conductivity 79, 169
high energy ion irradiation 865
ion irradiated 188, 548
ion irradiation 878
MARZ 169
microstructure 79
neutron irradiated 79, 160, 163, 174, 179, 625, 807, 816, 824, 860, 865, 883
OFHC 169, 174, 179
radiation hardening 548, 807, 883
radiation softening 188, 548
recrystallization 188
strength 532
swelling 79
thermal conductivity 169
thermal helium effect 654
use in compact devices 160
waste disposal limits 24
Copper and iron base alloys
oxide dispersion stabilized 427
rapidly solidified: structure and properties 427
Crack propagation 148
effect on thermal properties 119
SiC/SiC composite 148
Creep 486, 954
effect of helium 727, 982
microstructure effects 727
vanadium alloys 982
Creep rupture 476, 486, 536
ductility 476, 491
effects of helium 476, 491, 536, 727
stainless steel 476
vanadium-base alloys 1117
Criteria for materials selection 3, 1074
activation 1074
based on swelling 690

failure criteria 482
first wall 461

INSTRUCTIONS TO CONTRIBUTORS

Contributions may be written in English, French or German, and should be submitted *in duplicate* to one of the Editors, either directly or through a member of the Advisory Editorial Board.
The Editors may at their discretion submit contributions to referees. The submission of a contribution will be taken to imply that the author has satisfied himself that no copyright will thereby be infringed.
Submission of a paper to any of the Editors will be taken to imply that permission to publish has been given by the appropriate authorities. Neither the Editors nor the Publisher can accept any responsibility in this respect.

Abstracts should be written in the language of the contribution or, preferably, in English. The abstract should be on a separate sheet (complete with the title and names of the authors).
Abstracts should not exceed a total length of 150 words. Longer abstracts will be shortened by the Editors if necessary, without consulting the authors.

Manuscripts should be typewritten on one side of the paper only, with double spacings and wide margins. Only first copies and clear xerographic prints thereof are acceptable to the printers.

Headings and subheadings should be typed in lower case except for the initial capital letter.

Displayed formulae should be numbered and typed or *clearly* written by hand. Vectors will be printed in ***boldface italics*** (heavy, slanting type), and should be indicated by a wavy underlining in the typescript.
Otherwise no symbols should be underlined. Special attention should be paid to the clear distinction of characters which can easily be misread such as i (lower case), I (cap.), l (el), 1 (one), ′ (prime); o (lower case), O (cap.), 0 (zero); u, v (lower case), ν (greek nu), V (cap.); s, S; x, X, $\times$; p, P, ρ (Greek rho); etc. If necessary, unusual symbols should be explained in pencil in the margin.

Units and symbols: the use of metric units in the SI (Système Internationale) form is *obligatory*. Potential contributors are referred to the detailed editorial announcement on this matter published in the Journal of Nuclear Materials 73 (1978) 2. Reprints of this announcement can be obtained from any of the Editors or Editorial Advisers.

Tables should be typed on separate sheets, and should have a title in addition to their serial number; their desired location should be indicated in the margin of the text.

Figures: line drawings should be originals, drawn in black India ink or (preferably not) glossy prints of good quality. Xerox copies are *not* acceptable. Figures should be drawn in such a way that they can be reduced to a final width of 75 mm (i.e. the column width); in exceptional cases a reduction to a width of 160 mm (two columns) will be allowed. All the lettering (numerical scales, scale and curve legends, etc.) as well as the details (e.g. graph symbols) should be such that a height of 1.5–1.8 mm results after reduction. The lettering should be done with a lettering guide (stencil) or using stripletters (Letraset, etc.). Each figure should have a number and a caption. The captions should be typed on a seperate sheet. The desired location of figures should be indicated in the margin of the text. Photographs should be unmounted, unless they form part of a composite figure, and be richer in contrast than is desired in the printed version. Only original ink drawings and photographs will be returned after publication of the paper.

References to published literature should be quoted in the text by the name of the author followed by a number in square brackets in the sequence of citation. The references should be listed at the end of the typescript as in the following examples: [1] for a paper in a journal, [2] for a book, [3] for a paper in a Conference Proceeding, [4] for a paper in a contributed volume, [5] for a report of a laboratory:

[1] M. Gärtner and G. Fischer, J. Nucl. Mater. 149 (1987) 29.
[2] Hj. Matzke, Science of Advanced LMFBR Fuels (North-Holland Physics Publishing, Amsterdam, 1986) pp. 23.
[3] P. Allen, in: Proc. on Gas Cooled Reactors Today (BNES, London, 1982) pp. 65.
[4] J.E. Dendy, Jr., B. Swartz and B. Wendroff, Computing traveling wave solutions of a nonlinear heat equation, in: Topics in Numerical Analysis, Vol. III, Ed. J.J.H. Miller (Academic Press, London, 1977) pp. 447.
[5] R.L. Beck, Research and development of metal hydrides, USAEC Report, Denver Research Institute, LAR-10 (November 1960).

Footnotes should be avoided as far as possible.
Rapid publication: short manuscripts (not exceeding a total length of 2000 words) which have been entitled: "Letter to the Editors" by the author(s) will be published directly, without sending proofs to the author(s). Letters to the Editors require no abstract.

Corrections in the proofs should be limited to printer's errors; owing to the time-consuming and expensive work involved, any other changes in the proofs may be charged to the authors. They should therefore check their manuscript carefully for typographical errors and small inconsistencies. The submitted paper should be in final form.
Alterations in abstract are not acceptable at proof stage and will be ignored unless approved by one of the Editors.

Page charge and reprints: there will be no page charge. Reprints may be ordered from the publisher. An order form will be sent to contributors together with the proofs.

Books for review should be offered or sent to one of the Editors.

News or announcements should be submitted in duplicate to one of the Editors.

Upon acceptance of an article the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.
